To Do:s in this course:

- Get a deeper knowledge about ONE multivariate analysis method
- Register for a group (max. 4 members) in our moodle course, including selection of topic. Deadline: Nov. 4

Important dates:

- Nov. 4: Registering a group
- Nov. 16: Presentations at the VGU campus.
- Nov. 25: Submission of report

Examination:

- Report about the method the group has selected. Deadline: Nov. 25
- Presentation about the method the group has selected. Date: Nov. 16
- No written exam!

About the examination:

- Presentation length for each person: min. 3 min., max. 5 min.)
- Report per person: min. 2 pages, max 3 pages (but ONE report per group, not one report per group member)
- Group work should contain:
  - A brief explanation of the method: How it works, general objectives with this method etc
  - Strengths and weaknesses with your method
  - A practical part where you collect your own data (not only downloadef from internet!!! Make for example a survey among your colleagues!) and analyze it with your method.
  - As an appendix the code (R-code) you use for analyzing your data.

Available topics:

- Principal components analysis
- Logistic regression
- Cluster analysis (hierarchical)
- Cluster analysis (non-hierarchical)
- Discriminant analysis
- Canonical correlation analysis
